Step 1. Select Disk - R-UNDELETE 4.1.133533

R-UNDELETE™

Select presumable location for lost data.

If you think that missing data was located on one of the existing logical disks, select corresponding logical disk and click Next button. If the logical disk with lost data has been re-formatted, deleted or overwritten due to any other reasons, select corresponding physical drive or its partition and click Next button.

| Device/Disk | File System | Start | Size |
|--|-----------------|-----------|-----------|
| ST3320418ASCC44 | | 0 Bytes | 298.09 GB |
| Volume{445abf3b-13ef-11e0-b147-800000000000} | System Reserved | 1 MB | 100 MB |
| C: | System | 101 MB | 121.97 GB |
| D: | Data | 122.07 GB | 176.02 GB |
